
DEX-O-TEX®

Advanced Floor & Waterproofing System

Dex-Guard®

Designed for use on elevated walkways, decks and other concrete structures which require waterproofing, Dex-Guard® offers an attractive, easily maintained, modern floor finish which stands up to the elements and heavy foot traffic. Dex-Guard® offers superb waterproofing for long-term protection of the concrete and structural rebar. Dex-Guard® provides superior crack bridging and flexibility to accommodate movement of the structure. Highly customizable with a wide choice of colors, textures, patterns and effects. Dex-Guard® is a beautiful and cost-effective flooring solution for exterior above-ground concrete walkway and deck surfaces.

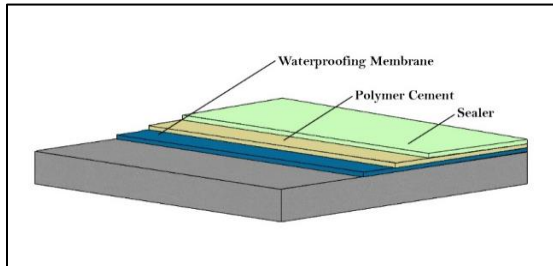

Advantages

- **Attractive** – Modern, high-end look. No other system provides as much design flexibility. Nearly any color or pattern can be achieved. Multiple choices of textures.
 - **Waterproof** - Integral waterproof membrane protects rebar in concrete reducing the chance of future structural problems.
 - **Crack Bridging** - Buildings move with wind and temperature fluctuations. Dex-Guard® uses a latex-modified cement coating making it flexible and able to bridge cracks.
 - **Cost Effective** - The traffic surface can be re-coated and made to look like new without replacing the waterproofing membrane. Carpet and tile require expensive membrane replacement.
 - **Durable** - Long duration warranties are available.
 - **Proven** - Specified by engineers, waterproofing experts and architects across the country.
